

MICROBLADE SKATE SIZE CHART

FIND YOUR CORRECT MICROBLADE SKATE SIZE

- Simple Method: We suggest selecting the adjustable skate size range that includes the child's normal shoe size.
- Detailed Method: While the Simple Method works for most kids, a more accurate fit can be found by following the instructions below and then choosing the appropriate skate size that includes the child's measurements.

MEASURE YOUR FEET

Use centimeters as a reference to find the best Rollerblade skate size. When measuring or tracing your feet, stand on a hard surface and place the heels against a wall for a more accurate measurement. Measure both feet and refer to the longer heel to toe measurement (see illustration).

SKATE PREP

Remove all paper and plastic from the toe box before putting the skates on. Securely fasten the closure system to lock the heels and ankles in.

CHECK FOR PROPER FIT

Toes should not be pressed against the front of the skate or cramped. The toes can slightly brush against the front of the skate because the heels will settle back while in the skating position to make more room for the toes.

Heels should have no to minimal lift.

MEASURED FOOT SIZE CM	SUGGESTED SIZE CM	SUGGESTED SIZE US	SUGGESTED SIZE UK	SUGGESTED SIZE EU
17.1-20.5	17.5-20.5	11J-1	10J-13J	28-32
